

XTRAIL

MAGOLINE
HANDBIKES

**BUILT FOR TRAILS.
BORN FOR THE *WILD*.**

PRECISION REDEFINED

Our fork mechanism makes it easy to adjust height and length giving you a personalized fit and delivers great stability through every curve, cruise and climb.

CLEAN LINES STRONG FORM

A clean frame design with a single bent tube.
Sleek, strong and made to impress.

SIMPLICITY IN MOTION

The rear wagon features smooth, clean lines.

Strong, refined and built to perfectly match the frame's design.

COMFORT THAT MOVES WITH YOU

Mounted directly to the frame, the dual rear suspension RockShox Monarch absorbs every bump and jolt, turning rough trails into smooth journeys.

It's comfort that invites you to explore farther, ride freer and feel every moment without holding back.

STABILITY & FREEDOM

The low, upright backrest is designed for dynamic and efficient pedaling. It provides optimal support without restricting movement, allowing you to push with power while maintaining an active and stable position throughout your ride.

POWER TO GO FURTHER

Mounted on the backrest for smart use of space, the battery system is available in single or dual configuration.

EVERYTHING IN SIGHT

The Bafang-connected display gives you all the essential info at a glance: speed, battery level, estimated range, total distance, ride time and your current power assist level. Clear, reliable and right where you need it.

RESPONSIVE BRAKING READY TO GO

The front brake lever is conveniently positioned on the right handgrip, right next to the gear shifter. This intuitive placement allows for quick, easy access.

SAFETY YOU CAN RELY ON

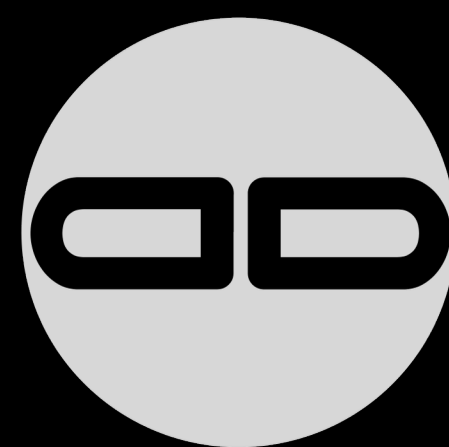

Additional to the front brake, the Tektro rear braking system lets you brake smoothly while riding and easily engage a secure parking brake when stopped. Designed for safety and peace of mind, the rear brake lever is conveniently located on the left handgrip

BRAKES YOU CAN TRUST

Equipped with two rear hydraulic disc brakes, this system provides precise and powerful stopping performance. Smooth and reliable, it ensures consistent braking control for safer rides, no matter the terrain.
